

DCNM-LVPM

DCN multimedia Voting Prep & Management

BOSCH

Invented for life

Introduction Announcement

► **Availability date**
March 6, 2015

Product Description

The DCN multimedia Voting Preparation and Management software module facilitates the preparation and management of one or more voting rounds in the Meeting Application of the DCN multimedia System Software. This allows for an advanced, efficient setup and management of voting sessions as demanded by councils and parliaments.

Features / benefits

- Voting scripts with voting subjects can be prepared beforehand and conveniently selected for voting
- Different answer sets in voting
- Voting authorization can be individually defined for participants
- Voting results stored as tamper proof xml file for archiving and reporting
- API for importing voting scripts, controlling voting and optionally displaying (total and/or individual) voting results on external large screens
